

COMBAT AND TRAINING ACCESSORIES

HK 21 E with belt box, telescope sight and assault grip

BELT BOX

The Heckler & Koch belt box holds 100 rounds belted ammunition of calibre 7.62 mm x 51 and is rapidly attachable to the bottom of the belt feed housing. It considerably facilitates the handling of long belts.

SIGHT MOUNT

A quickly attachable/detachable sight mount is available for the Heckler & Koch Machine Guns which fits all sighting devices with STANAG fitting dimensions. The HK sight mount is shock proof and ensures an unchanged boresight after repeated attachment and detachment.

ASSAULT GRIP

For holding the HK Machine Gun when firing from the hip the firer may fix the quickly attachable assault grip at his convenience in a slot on the front of the receiver.

Transport container for exchange barrel

Barrel for firing blank cartridges

Grip-integrated field cleaning kit

Exchange barrels can be safely stored and kept ready in this transport container which also protects the firer from hot barrels.

This blank firing barrel is adjustable for different types of blank rounds and permits firing the Heckler & Koch Machine Guns for training in all modes of fire.

A field cleaning kit can be stored inside the Machine Gun's grip.

TECHNICAL DATA  
HK 21 E/HK 11 E
